

Damilola Peter Meshe

Backend Engineer | Python, Django & AWS | API Integrations & AI Connectors (MCP)

Lagos, Nigeria · Open to remote | +234 813 931 5800 | mdpeter28@gmail.com

linkedin.com/in/damilola-peter-meshe-4b2b26231 | github.com/MESHEmugles | mdp-eta.vercel.app

Backend engineer who builds, ships and runs production systems for US clients. Launched a fuel-rewards app that reached 2,000 users in two weeks and now serves 5K active users, migrated two client platforms to AWS, and automated Sage Intacct bookkeeping for a 13-dispensary retailer. Build MCP connectors so client teams can query their systems from Claude and ChatGPT.

EXPERIENCE

Full Stack Developer | Benmore Technologies - Chicago (Remote)

Apr 2024 – Present

Noble Gas Rewards | Fuel & car-wash loyalty app · noble-portal.com

2025 – Present

- Launched a fuel and car-wash loyalty app on iOS and Android that reached 2,000 users in its first two weeks and now serves 5K active users.
- Integrated the Gilbarco POS and a car-wash vendor API so points post automatically at the pump and register; coordinated on-site pump setup with the field team.
- Migrated production from Heroku to AWS with Terraform (ECS Fargate, RDS, ElastiCache, S3, CloudFront, ALB, VPC, NAT gateway) and moved CI/CD to CodePipeline.
- Cut CI test time by over 60% (107 to ~40 min) across a 12,000+ test suite, speeding up every merge and release.
- Owned production reliability: root-cause fixes backed by regression tests, plus CloudWatch alarms and SNS alerts.
- Designed an employer fuel program with real-time tier updates over WebSockets, adding a B2B revenue stream.
- Built an MCP server that lets staff run back-office operations from Claude and ChatGPT, secured with OAuth 2.1, scoped approval codes and audit logs.

Tech Stack: Django · Celery · Redis · PostgreSQL · Flutter · WebSockets · AWS · Terraform · MCP

The 357 Company → **ALG Worldwide Logistics** | Freight portal · algfinalmile.algworldwide.com 2024 – Present

- Owned the freight portal end to end as sole engineer: orders, shipping labels and carrier onboarding on a platform that has processed 80,000+ orders.
- Led the platform through its acquisition by ALG Worldwide Logistics (Feb 2025), migrating it from DigitalOcean to ALG's AWS with every table verified by row count.
- Integrated Better Trucks and eCourier (NeedItNow) carrier APIs and built exactly-once booking, preventing double-booked freight.
- Diagnosed and fixed a carrier webhook delivery failure, recovering the affected delivery events and order statuses.
- Hardened access control and customer data isolation, growing the test suite from 267 to 1,100+ tests.

Tech Stack: Django · PostgreSQL · AWS (EC2, WAF) · Better Trucks API · eCourier · Webhooks

Sun Theory | Sage Intacct ERP integrations · 13 dispensaries

2024 – Present

- Automated bookkeeping by syncing Flowhub POS sales into Sage Intacct as daily balanced GL journal batches, with automatic reversals for voided orders.
- Integrated LeafLink wholesale orders into Sage customers and AR invoices and synced payments back to LeafLink, removing double entry.
- Automated payroll posting from Greenleaf into Sage Intacct journal entries.
- Made every sync idempotent and retry-safe, with failure logging and email alerts.
- Built an MCP connector so the client's team can query their data from Claude and ChatGPT.

Tech Stack: Django · Sage Intacct (XML API) · Flowhub · LeafLink · Greenleaf · REST APIs · MCP

Benmore Client & Operations Portal | client.benmore.tech

2024 – Present

- Co-built Benmore's client and operations portal with the founder (~1,000 commits): client portal, billing, finance and team tools.
- Built client billing with Stripe: e-signature documents with payment links, installment invoices, and webhook-driven receipts.
- Built finance and reporting tools, including payment reconciliation and bank-data integration.
- Strengthened security with 2FA and device trust, OWASP ZAP fixes and field-level encryption for sensitive data; extended sessions from 8 hours to 10 days.

Tech Stack: Django · PostgreSQL · PgBouncer · Redis · Stripe · Slack API · DigitalOcean App Platform

Sales CRM Automation | *Notion CRM & sales funnel*

Aug 2024 – Feb 2025, Sep 2026

- Automated daily sales, booking, no-show and Facebook ad-spend reporting into the Notion CRM with scheduled jobs (APScheduler, RQ).
- Automated closer hand-off and close dates from Calendly webhooks and CRM status changes, with backfills that completed the analyst's funnel data.

Tech Stack: Python · Flask · Notion API · Calendly · Facebook Ads API · Heroku

Technical Support Engineer | NuMartng (Nudakol Systems Ltd.) - Lagos

Apr 2022 – Jan 2023

- Handled customer purchase inquiries and tracked inventory and sales for an e-commerce store.

EDUCATION

Mountain Top University - Ogun State | B.Sc. Computer Science (2024)

SKILLS

Languages & Data: Python · SQL · TypeScript · JavaScript · Dart · PostgreSQL · Redis · MySQL

Backend: Django · Django REST Framework · Celery · Django Channels · Flask · FastAPI · REST APIs · OAuth 2.0

Cloud & DevOps: AWS (ECS Fargate, EC2, RDS, ElastiCache, S3, CloudFront, WAF) · Terraform · Docker · GitHub Actions · DigitalOcean · Heroku

Integrations: Sage Intacct · Flowhub · LeafLink · Greenleaf · Gilbarco POS · Better Trucks · eCourier · Stripe · Plaid · Notion · Calendly · Slack

AI: MCP · LLM Agents · RAG · Rasa · Claude · ChatGPT | **Spoken:** English · French · Yoruba
